

DRAW AND PAINT A

PORTRAIT

Let's try drawing a face then painting a portrait

Start by drawing a simple oval with a faint line half way across.

Notice how the eyes rest on the line.

Now draw the eyebrows and follow the line down the length of the nose.

The lips are directly below and the ears line up with the eyes and the bottom of the nose.

Now draw in the hair line and hair.

Use this drawing to give you inspiration to start your first portrait painting.

Have a look at our YouTube video which will show you how to paint portraits. Go at your own speed and remember to enjoy yourself.

What you will need:

Pencil, Paper, Paints and Paintbrushes
