A great salt dough rock recipe for making your own fossils!

Mix all the ingredients together in a bowl adding small amounts of water until it forms a dough and turn out on to a floured surface.

Knead until smooth and roll into small flat 'Rocks'.

Press in your favourite 'fossils'- you can use toy dinosaurs or shells or other small toys!

Microwave for 3 minutes or leave to air dry for at least a day.

You can paint your 'fossil' to look more realistic.

PS: DO NOT EAT THE FOSSILS – THEY WON'T TASTE VERY NICE!

What you will need:

1 cup of salt,

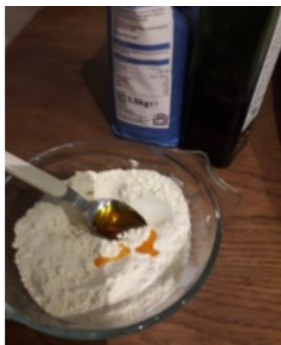

1 cup of flour

2 tablespoons of oil

A spoonful of coffee granules (for colour)

A few tablespoons of water

Some toy dinosaurs, fossils or shells
