

Tameside Local Offer response September 2017

Website response during the year

There were no formal responses to the website this year. However as a result of working on an area self evaluation , it was recognised that the Local Offer as a source of information is not well known amongst parents.

The Local Offer site is compliant with requirements and contains a range of useful information and the site is considered easy to navigate.

- We introduced information about the Local Offer on a postcard and these have been distributed to schools, colleges, SENCOs, venues and given to parents in order to promote the Local Offer.
- Briefing sessions with SENCOs and Governors have taken place on using and promoting the Local Offer
- Although parents/carers, children and young people were consulted about and contributed to the development of the Local Offer, it is recognised that further engagement is required with parents/carers, children and young people to review its' efficacy and currency.
