

# DOMESTIC ABUSE AND LIFE-LIMITING ILLNESS

## It's a risk factor for domestic abuse

Increased dependence on carer

Social isolation

Change in relationship dynamics

## Ask open-ended questions

Further questions required to get the full picture

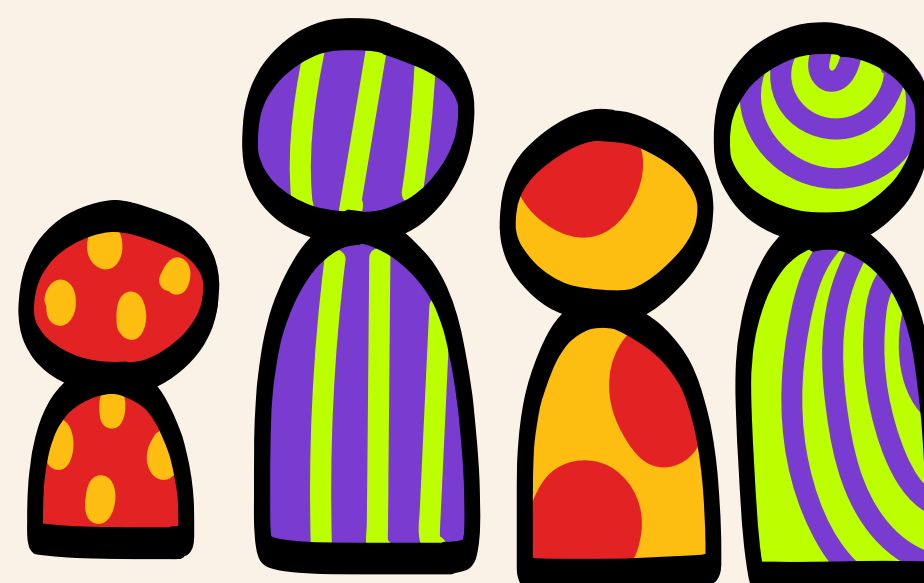

## Assess whether there is immediate risk of harm

If so, contact 999

## Check whether children or vulnerable are involved

If so, referral to child's/adult's services is needed for risk assessment

## For more information
