1. Introduction

This statement describes the process and findings of the Equality Impact Assessment (EqIA) which is an integral element of the Integrated Assessment of the Homes, Spaces and Places Plan for Tameside ('The Plan'). The EqIA for the Plan is not a separate process and has been embedded within the IA. However, for transparency and clarity, this separate statement as part of the EqIA is provided as an appendix to the full IA.

1.1 Background

As detailed in Section 2.1.3 of the IA Main Report, the Equality Act imposes a duty on public bodies that shape policy, deliver services and/or employ people. The duty requires public bodies to:

- Have due regard to the need to eliminate discrimination;
- advance equality of opportunity; and
- foster good relations between different people when carrying out their activities.

The IA needs to consider in its scope, the likely effects on discriminatory practices; the potential to alter the opportunities of certain groups of people; and/or effect on relationships between different groups of people. In order to understand which groups of people (or individuals), may suffer discrimination, the Equality Act sets out a series of "protected characteristics":

- Age;
- Disability;
- Gender Reassignment;
- Marriage and Civil Partnership;
- Pregnancy and Maternity;
- Race;
- Religion or Belief;
- Sex; and
- Sexual Orientation

The EqIA is designed to ensure that discrimination does not occur in the drawing up of plans and policies, and that such plans or policies meet the requirements of equality legislation in the UK, most notably the Equality Act 2010. It is being used as part of the IA to add value and depth to the assessment process.

It should be noted that the EqIA seeks to not only avoid / mitigate negative impacts on equality, but is also focused on enhancing, in this case the Plan's policies, in relation to equality matters. As such, the IA goes beyond the minimum requirements of assessing impacts in line with the Equality Act 2010, but also provides a holistic assessment of equality, diversity and health and wellbeing (an important factor in determining equality) and embeds this within the IA framework and throughout the assessment of the iterations of the draft Plan.

1.2 Purpose of the EqIA Statement

The purpose of this EqIA Statement is to outline how due regard has been given in the Full IA to the potential effects of the proposed policies and strategy on the protected characteristics or persons identified under the Equality Act, but also looking at equality issues more holistically (as explained above). This Statement is structured to demonstrate compliance with the requirements of the Equality Act 2010. It includes the following sections:

- Section 2: Summary of requirements of Equality Act 2010;
- Section 3: Description of EqIA screening methodology;
- Section 4: Results of EqIA screening assessment; and
- Section 5: Summary and conclusions

2. Requirements of the Equality Act 2010

The Equality Act (2010) came into effect in October 2010 with the aim of harmonising all current discrimination law and strengthening the laws that prevent discrimination. It applies to the provision of services and public functions and includes the development of local authority policies and plans. The Act maintains the protection provided by previous legislation and therefore prevents discrimination on the basis of nine protected characteristics: age; disability; gender reassignment; marriage and civil partnership; pregnancy and maternity; race; religion or belief; sex; and sexual orientation.

Inequality can exist in a number of forms and with regards to spatial planning, this can include inadequate provision of, and access to services (e.g. health, food stores, and education facilities), good quality housing, employment opportunities, a healthy living environment and transport infrastructure for all members of society.

The Equality Act 2010 does not outline how public authorities should assess the effects on equality of new policies and programmes, but doing so is an important part of complying with the general duty. The approach in this report reflects the principles of the Equality Framework for Local Government¹.

An EqIA seeks to improve the work of local authorities and ensures that the policies and plans it develops do not discriminate in the manner in which they provide services and employment. EqIA also aims to ensure that local authorities do all they can to advance equality of opportunity between the people who do, and the people who do not share a relevant protected characteristic.

¹ Equality and Human Rights Commission (2009). Equality Impact Assessment Guidance.

3. Methodology of the EqlA

3.1 Key Stages of the EqlA

The methodology adopted for the EqlA of the draft Plan involves two principal stages.

Stage 1 is the EqlA screening, with stages as follows:

- Identification of the purpose/aims of the strategy/plan;
- Identification of other plans/policies/strategies that relate to the strategy/plan in relation to equality;
- Summarise baseline information on equality issues; and
- Assess the impacts of the strategy/plan on protected characteristics or persons.

The steps within Stage 2 include:

- Gathering of any additional baseline information;
- Agreement of scope with wider stakeholders as necessary;
- Detailed assessment of strategy/plan; recommendations for mitigation; identification of monitoring measures for implementation; and
- Reporting of EqlA results, further consultation as necessary and finalise based on responses.

3.2 EqlA Screening

The Screening stage has been split into four tasks as set out below.

Task 1: Identification of the vision and objectives of the Plan

The following questions were used as part of this task:

- What are the main visions, objectives and outcomes of the Plan and its policies?
- Who will implement the Plan's policies?
- Who will be affected by the Plan's policies?

Task 2: Description of other plans, programmes and strategies related to or used to develop the Plan

This identified relevant documents that relate to the development of the Plan in relation to equality. This task was completed as part of the IA Scoping stage and detailed in the IA's Scoping Report.

Task 3: Review baseline data

This involves identifying relevant data on equality issues across Tameside's geography. This task was completed as part of the IA Scoping stage and detailed in the IA's Scoping Report.

Task 4: Screening assessment

This task brings together information gained at Tasks 1-3 to support a screening conclusion, which is embedded within the IA Scoping and Assessment process. The assessment uses the IA scoring categories used across the IA, shown in Table 1, with the assessment informed by the following questions:

- Will the policy have a negative impact on the protected characteristic or person?
- How can the identified negative impact be avoided or mitigated?
- How can identified positive impacts be enhanced?
- Is monitoring of the issue during implementation required?

This assessment focuses on the identified protected characteristics identified in the Equality Act. The wider EqIA assessment has been embedded into the full IA. The IA Framework includes specific Objectives regarding equality: "Promote equality of opportunity and the elimination of discrimination" and reducing deprivation and disparity: "Reduce levels of deprivation and disparity".

Table 1: Assessment Key

Score	Assessment Description
++	Very positive effect
+	Positive effect
?	Uncertain
-	Negative effect
--	Very negative effect
O	Neutral/no effect

4. Results of the EqIA Screening Assessment

The screening assessment Task 1 to 3 below formed part of the scoping stage for the IA. This ensured that equality issues were embedded into the IA from the outset. For completeness, the tasks are summarised here.

4.1 Task 1: Identification of the vision and objectives of the Plan

What are the main aims, objectives, purpose and outcomes of the Plan and its policies?

The plan sets out the proposed strategy for Tameside for residential and employment development, in addition to supporting the delivery of associated utility, transport, social and environmental infrastructure to support local communities, workers and visitors to Tameside. The Plan outlines its vision and objectives for the borough in greater detail, which are also included within Section 1.2 of the IA Main Report. Similarly, the Plan also outlines policies for the borough to support the delivery of the Plan's vision and objectives. These are assessed as part of Section 4 of the Main Report.

Who will implement the Plan Policies?

Tameside Metropolitan Borough Council will implement the Plan. Once the plan is adopted, the Council and elected members will take on the responsibility for its implementation and delivery.

Who will be affected by the Plan Policies?

The Plan applies to the borough of Tameside. It will affect people living, working and visiting this area.

4.2 Task 2: Description of other plans, programmes and strategies related to or used to develop the Plan

A summary of plans, programmes and strategies that are most directly related to the Plan in relation to equality issues are provided within the Scoping Report. They include:

- United Nations Sustainable Development Goals (2015)
- Children's Environment and Health Action Plan (2007)
- Children's Environment and Health Strategy for the United Kingdom (2010)

- Department of Health Living Well with Dementia: A National Dementia Strategy (2009)
- Department of Health Prime Minister's Challenge on Dementia 2020 and Implementation Plan (2015/2016)
- HM Government Housing Act 2004 (2004)
- HM Government Securing the Future - Delivering UK Sustainable Development Strategy (2005)
- GMCA Places for Everyone (2023)
- GMCA Greater Manchester Work & Skills Strategy and Priorities 2016 to 2019 (2016)
- Greater Manchester Strategy 2021-2031
- Tameside Metropolitan Borough Council Housing Strategy 2021-2026
- Tameside Metropolitan Borough Council Cultural Framework
- Tameside Metropolitan Borough Council Smarter, Stronger, Sooner, Safer Early Help Strategy 2020-2022
- Tameside Metropolitan Borough Council Preventing Homelessness and Rough Sleeping Strategy 2018-2021
- Tameside Metropolitan Borough Council Tameside Joint Health and Wellbeing Strategy 2013-2016 (2013)
- Tameside Metropolitan Borough Council One Equality Scheme 2018-2022
- Tameside Metropolitan Borough Council Inclusive Growth Strategy 2021-2026
- Tameside Metropolitan Borough Council and Glossop Engagement Strategy
- Tameside Metropolitan Borough Council Equal Opportunities Policy
- Tameside Metropolitan Borough Council Our People, Our Place, Our Plan- Corporate Plan for Tameside and Glossop
- Tameside Metropolitan Borough Council Safeguarding Adults Strategy 2019-2022

- Tameside Metropolitan Borough Council Tameside Poverty Strategy 2014-2017 (2014)

4.3 Task 3: Review Baseline Data

The IA Scoping Report details the population and demographic baseline and trends for Tameside. This should be referred to for data related to many of the Equality Act 2010 protected characteristics. Please note that it was not possible to readily obtain data at the Tameside level for all protected characteristics. This is not considered to be a significant limitation to the EqIA assessment process given that the assessment is based on the nature (positive, negative, neutral or uncertain) of the effect.

4.4 Task 4: Screening Assessment

This section summarises the Equality Impact Screening, including for new and amended Regulation 19 Plan policies and allocations, following the latest consultation from December 2025 to February 2026. The tables contained with Appendix A.1 and A.2 show the 2025 screening assessment, and Appendix A.3 and A.4 show the 2026 reassessment. The Thematic Policy or Allocation references are on the lefthand side, with the nine protected characteristics along the top of the table.

A number of policies within the Plan have received improved scores against Objective 5: “Promote equality of opportunity and the elimination of discrimination” and against the nine protected characteristics of the Equality Act 2010. Whilst the updated 2026 position is outlined in detail as an integral part of the IA Main Report, Section 4.4.2 summarises a number of the key changes (however, this is not an exhaustive list).

An Equality Impact Screening of the Plan objectives was conducted for the IA of the options and preference Plan, and whilst the Plan’s objectives have since been updated, these changes were minor and therefore they have not been subject to formal reassessment.

4.4.1 Thematic Policies (2025)

The Plan has eight thematic policy chapters which mirror the Plan objectives, except for the addition of the Spatial Framework chapter. The policies are strategic in nature, and therefore they do not tend to focus on protected characteristics. Most of the policies, as a result, are expected to have a neutral effect against the protected characteristics.

The policies under the 'Spatial Framework' Thematic Policy Chapter received primarily neutral scores. Policy HSP S2C (Hyde Triangle) and HSP S2G (Droylsden), however, had a very strong alignment with the 'age' and 'disability' protected characteristics due to referencing new play spaces, step-free access, and wheeling along the canal network. Policy HSP S2K (Mossley) and HSP S2L (Stalybridge) also scored positively in these areas as they consider the need to lessen car dominance, provide resting places, and unlock the canal and river network through accessibility improvements. Policy HSP S2E (Audenshaw) supports the delivery of family housing and therefore scored positively in terms of 'marriage and civil partnership' and 'pregnancy and maternity'. Policy HSP S2J scored positively against all the protected characteristics due to its references to improving safety and community cohesion, and promoting community involvement through the provision of gardens and cafes

Policy HSP C1 (Network, Hierarchy and Designation of Centres), under the 'Centres' Thematic Policy Chapter, scored positively against the protected characteristics due its reference to supporting thriving communities and making centres safe, inclusive, and welcoming. Under the same Thematic Policy Chapter, Policy HSP C6 (Markets) will have a positive impact on all Tameside residents through improved public realm and community events, which will enhance community cohesion. Policy HSP C7 (Healthier Food Environments) had a very positive alignment with the 'age' protected characteristic, as it focuses upon healthier food environments, particularly around secondary schools, colleges, and other places that young people congregate, to support their health. It also received single positive scores against all other characteristics due to ensuring hot food takeaways are not located within the 30% most deprived areas in England. Similarly, Policy HSP C8 aims to protect developments focused around both young and older people from food drink and uses in centres, resulting in a positive alignment with the 'age' and 'disability' characteristics.

Both the 'Environment' and 'Jobs' Thematic Policy Chapters received neutral scores across all policies due to their lack of focus on people and protected characteristics.

Within the 'Homes' Thematic Policy Chapter, Policies HSP H2 (Meeting Affordable Housing Needs), HSP H3 (Meeting Specific Housing Needs), and HSP H6 (Gypsy, Traveller and Travelling Showpeople) all received very positive scoring against the 'age' and 'disability' protected characteristics, due to referencing housing for older people and children, and ensuring access to health and education establishments. Policy HSP H6 also had a very positive alignment in terms of pregnancy, race, and religion due to references

to health access, and by providing new sites to meet the needs of gypsies, travellers, and travelling show people, Tameside are helping to reduce discrimination and support cultural and religious freedom.

Policy HSP PE1 (Development and Healthier Environments) under the 'People' Thematic Policy Chapter scored very positive against all protected characteristics as it references the health and wellbeing of different groups, and particularly mentions play, accessibility, community safety, social connection, and neighbourhood facilities. Policies HSP PE2 (Protection and Enhancement of Open Spaces), PE3 (Open Space Provision in New Developments), and PE4 (Strategic Recreation and Countryside Access) also received positive scores against all protected characteristics for references to play, cultural events, health and wellbeing, and creating safe and inclusive places for all. Policy HSP PE7 (Early Years, Schools and Post16 Education Facilities) had a very strong positive alignment with the 'age' protected characteristic. Policy HSP PE8 (Provision of Health and Social Care Facilities) and HSP PE9 (Tameside General Hospital) also scored highly here, as well as against 'disability', 'gender reassignment', and 'pregnancy and maternity' protected characteristics, as improvements to the quality and access of these facilities will have a positive impact on the individuals aligned with them.

Within Thematic Policy Chapter 'Travel', six policies scored positively. Policy HSP T1 (General Approach), Policy HSP T3 (Rail Infrastructure), and Policy HSP T6 (Walking, Wheeling and Cycling) aligned strongly with the age and disability protected characteristics, due to referencing wheeling. Policy HSP T3 also scored well against pregnancy and maternity as it supports the provision of new stations and facilities that support all access needs. Policy HSP T5 (Facilities for Buses) scored positively against all protected characteristics as it proposes to facilitate safe and accessible bus passenger waiting and interchange facilities, which will help to protect and enable all communities. Policies HSP T4 (Rapid Transit) and HSP T8 (Parking) scored positively in terms of age and disability as they reference using the 'Parking for All' standards and ensure safety and accessibility.

Under the 'Places' Thematic Policy Chapter, both Policy HSP PL1 (Archaeology and Scheduled Monuments) and HSP PL2 (Listed Buildings) scored very positively against the 'age' protected characteristic as they will support measures which facilitate the interpretation of the heritage asset within the adjacent public realm, in light of their educational potential. These policies also scored well in terms of 'disability' for their facilitation of accessibility to heritage assets. Policy HSP PL6 had

a positive alignment against all the protected characteristics due to referencing engagement with stakeholders and the local community. Policies HSP PL8 (Design and Amenity), HSP PL12 (Design and Enhancement of the Waterside) and HSP PL13 (Design of Public Realm and Urban Spaces) also had a positive alignment against all the protected characteristics as they focus on accessibility and safety for all.

4.4.2 Thematic Policies (2026)

The policies under the 'Spatial Framework' Thematic Policy Chapter continued to receive primarily neutral scores. Policies HSP S2D (Ashton-under-Lyne), HSP S2E (Audenshaw), HSP S2F (Denton), HSP S2J (Longdendale), and HSP S2K (Mossley) have been amended to reference wheeling, improving accessibility and pedestrian safety, and therefore, their scores have been updated to be very positive against the 'age' and 'disability' protected characteristics. Policy S2H (Dukinfield) was also assessed positively against these characteristics as it now aims to improve access to sports and leisure for disabled people. Policy HSP S2G (Droylsden) now refers to supporting family-oriented communities, so has a stronger alignment against the 'marriage and civil partnership' and 'pregnancy and maternity' characteristics.

Policy HSP C1 (Network, Hierarchy and Designation of Centres) and HSP C6 (Markets) under the 'Centres' Thematic Policy Chapter, scored very positively against the 'age' and 'disability' protected characteristics due to updated references to wheeling.

The 'Environment' Thematic Policy Chapter continued to receive mostly neutral scores across all policies due to its lack of focus on people and protected characteristics. However, Policy HSP E1 has been updated to reference consideration of local amenity, including safety, and giving weight to social benefits from proposals; therefore, the score has improved to positive across all protected characteristics.

Policy HSP H1, under the 'Homes' Thematic Policy Chapter received improved scores across all protected characteristics due to referencing the creation of inclusive communities. It received very positive scores against the 'age', 'disability', 'marriage and civil partnership', and 'pregnancy and maternity' protected characteristics as it references providing housing for disabled people, families with children, children in care and care leavers, and first-time buyers respectively. Policy HSP H4 also gained a stronger alignment against the 'age' and 'disability' protected characteristics as it references the delivery of Build to Rent homes for older people and younger households.

The 'Jobs' Thematic Policy Chapter has received improved scores, with Policy HSP J4 (The Visitor Economy) referencing accessibility and therefore having a strong alignment with the 'age' and 'disability' protected characteristics. Policy HSP J5 (Skills, Training, Apprenticeships, and Local Labour Agreements) had a very positive alignment against all the protected characteristics as it references inclusive economic growth and the aim to support underrepresented groups. Policy HSP J2 (New Employment Development), has been amended from neutral to negative against the 'age' and 'disability' protected characteristics as it states that support will be given to proposals that are accessible by walking and cycling, however, it does not reference wheeling. It has therefore been recommended that reference to wheeling is added to enhance the policy.

Policy HSP PE2 (Protection and Enhancement of Accessible Open Spaces) under the 'People' Thematic Policy Chapter now has a stronger alignment against the 'age' protected characteristic as it references providing play space for children and teenagers. Policies HSP PE5 (Indoor and Outdoor Sport and Recreational Facilities) and HSP PE7 (Early Years Provision, Schools and Post-16 Education Facilities) have also received improved scores against the 'age' and 'disability' protected characteristics due to references to wheeling and the needs of students. Policy HSP PE5 and HSP PE3 (Open Space Provision in New Developments) now have a strong alignment against all protected characteristics as they reference access, inclusion, safety, and having regard to local needs.

The assessment of the 'Travel' Thematic Policy Chapter remained the same due to limited amendments.

Under the 'Places' Thematic Policy Chapter, Policies HSP PL7 (Landscapes, Townscape and Urban), HSP PL8 (Design and Amenity), HSP PL10 (Design of Commercial Frontages and Shopfronts) and HSP PL13 (Design of Public Realm and Urban Spaces) received very positive scores against all protected characteristics, due to referencing safe, accessible, and inclusive environments, and meeting the diverse needs of all users, including current and future residents. Policy PL2 (Listed Buildings – Alternative Uses, Additions, Demolition and Development within their Setting) had a positive score against the 'age' protected characteristic as it referenced facilitating access to heritage assets through educational opportunities, however, this has been removed and therefore the score has been changed to neutral. It is therefore recommended that the reference to education is added back into the policy text to enhance the policy.

4.4.3 Allocations (2025)

The Plan has 30 housing allocations and 20 employment allocations which were selected using a sound methodology based around the IA Objectives and are strategic in nature; therefore, they do not tend to focus on protected characteristics.

All the allocations, except for one, had a neutral effect against the protected characteristics. HSP S2F Allocation 7 (Land South of Greswell, Denton), however, had a weak alignment against the 'age' protected characteristic as it is currently an area of green space which includes young person's sport provision. Whilst the site is not located in an area identified in the open space study as being in an area of need, development would still result in the loss of this provision, having a negative impact on this group.

4.4.4 Allocations (2026)

The Plan now has 28 housing allocations and 20 employment allocations as HSP S2F Allocation 4 (Two Trees Lane) and HSP S2L Allocation 7 (Stalybridge Cricket Club) have been removed.

The scores for all allocations have remained the same, subject to a full understanding of their use and within the wider geographic context and taking the Council's other relevant policies and evidence into consideration.

For allocation HSP S2F Allocation 6 (Land South of Greswell, Denton, previously Allocation 7), which continued to hold a weak alignment against the 'age' protected characteristic, it is recommended that new development maximises the ability to mitigate for the loss of the existing sports provision.

5. Conclusions

The Plan sets out the proposed approach that Tameside will take towards the planning of the future borough. The development of the Plan has been influenced by a number of other plans, programmes and assessments that relate to the protected characteristics or persons under the Equality Act 2010. EqlA considerations have been included within the IA objectives as part of the Integrated Assessment of the Plan.

It is important to note that a number of the policies and allocations in the assessment table are scored as having a neutral impact against the protected characteristics. This is due to the holistic, strategic nature of the plan with the delivery partners and relevant authorities providing further detail in the future regarding the design and implementation of development schemes within the Plan area as appropriate.

The assessment, which was integral to the IA and summarised within this EqlA Statement, has found that the Plan is unlikely to have negative effects on protected characteristics or persons identified under the Equality Act 2010 and as a result, an independent EqlA has not been deemed necessary. EqlA considerations have been included within the IA objectives as part of the Integrated Assessment of the Plan.
