

## **Recycle more to make a difference to our environment**

Stalybridge resident Susan Sumner has been on the [Bin Swap scheme](#) for two months but says she has always been a keen recycler. She believes it's the right thing to do to protect the environment.

Susan, who lives with her husband Dek (Derek) and 28-year-old daughter Lisa has been recycling since her daughter was a youngster.

She said: "Twenty years ago we were visiting Blackpool Zoo and saw a bird being strangled by a plastic holder from a beer can. It just made me think, and made me more conscious of protecting nature and the environment.

"Although I wouldn't describe our family as fully fledged eco-warriors, I believe we can all recycle more to make a difference to our environment.

"I find the Bin Swap scheme straightforward, even though I occasionally check that I'm placing items in the right bin. I also think we need to encourage families to recycle more as it all helps to educate people for the future."
